

# API Specifications

## 1. Introduction

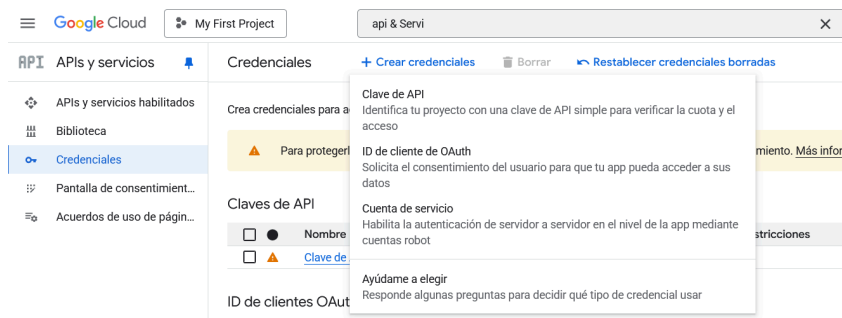

This document aims to detail the technical specifications required for the correct installation, configuration, and integration of the Google Authentication, Google Calendar, Gmail and WhatsApp Business APIs within a development or production environment. These tools provided by Google and Meta allow for secure user authentication, calendar event management, email sending and whatsapp notifications from authorized accounts.

## 2. Configuration in Google Cloud Console

- Go to: <https://console.cloud.google.com/>
- Open API & Services (using the search tool can make it easier to follow the instructions)

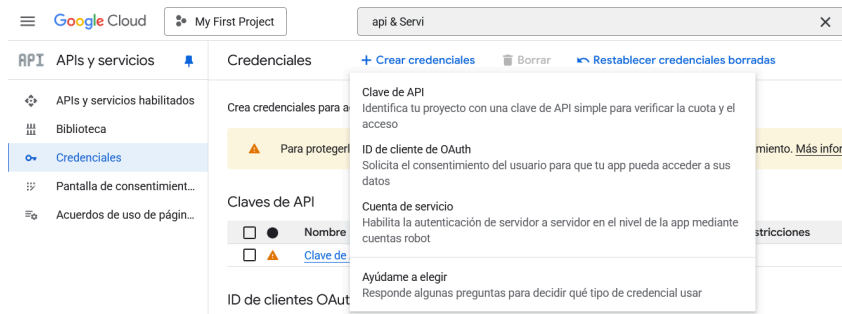

### c. Create a new OAuth Client

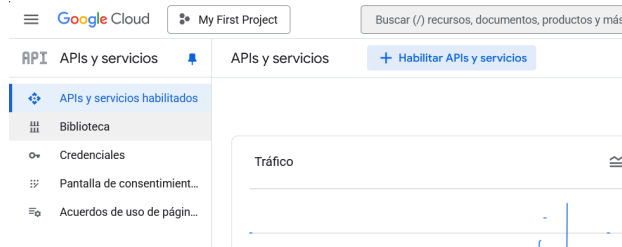

- Web application
- Name: Nebula {or the name of the application}
- Authorized origins: <https://tec2.nuclea.solutions> {app url}
- Authorized URIs: [https://{url}log\\_in/google/callback](https://{url}log_in/google/callback)

### d. Create API key

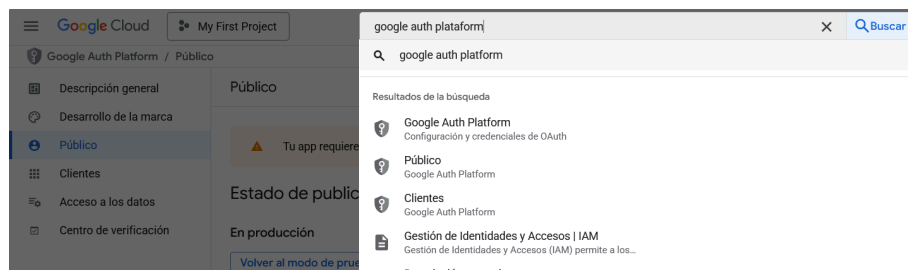

- e. Insert the API key and secret on the .env document under the variables:
  - i. GOOGLE\_CLIENT\_ID
  - ii. GOOGLE\_CLIENT\_SECRET

**f. API & services**

**g. Enable API & Services**

- i. Activate Google Calendar API
  - ii. Activate Google Drive API
- h. To grant access to the public or let people of the organization sign into the page it is necessary to verify the page with google, which will require a Terms of Service page, and Terms of Use

### 3. API-by-API Integration

**a. Google Authentication (OAuth 2.0)**

- i. Insert the API key and secret from Google Console on the .env document under the variables:
  1. GOOGLE\_CLIENT\_ID
  2. GOOGLE\_CLIENT\_SECRET

**b. Google Calendar API**

- i. Create two calendars in [Google Calendar](#): Meetings and Events. Make sure to share them with the other SuperAdmins.

Create new calendar
Name
Description
Time zone
(GMT-06:00) Central Standard Time - El Sal...
Owner
Kamila Jeannette Martinez Ibarra
Create calendar

- ii. For each calendar, go to its settings and locate the **Calendar ID**.

Integrate calendar
Calendar ID
a1554e77a958b1937b050bcd09502596cd4f672bc26aba26f64157f0cf8200b0@group.calendar.google.com
Public URL to this calendar
https://calendar.google.com/calendar/embed?src=a1554e77a958b1937b050bcd09502596c
Use this URL to access this calendar from a web browser.
Embed code
<iframe src="https://calendar.google.com/calendar/embed?src=a1554e77a958b1937b050bcd09502596c
Use this code to embed this calendar in a web page.
You can customize the code or embed multiple calendars.
Customize

- iii. In your .env file, copy the Calendar IDs into their corresponding global variables.

```

CALENDAR_ID_MEETING = ''
CALENDAR_ID_EVENT = ''

```

### c. Gmail API

- i. You will require an email address and an app password.
  1. To create an app password, you need 2-Step Verification on your Google Account.
- ii. [Create and manage your app passwords.](#)
- iii. In your .env file, copy the mail username and password provided previously.

```

MAIL_USERNAME = ''
MAIL_PASSWORD = ''

```

#### d. WhatsApp Business API

- i. In your .env file, copy the token provided

```
WHATSAPP_TOKEN = ' '
```

- ii. For the notifications that will we sent directly to the Human Resources Manager, is important to specify its corresponding email in *backend/models/collabs.model.js* in order to obtain its phone number and register it in the WhatsApp Business dashboard

```
static fetchFaultNoti(id_colaborador) {  
  return db.execute(  
    `SELECT c.nombre, c.apellidos,  
      (SELECT telefono FROM colaborador WHERE email = 'contenido1@nuclea.solutions' LIMIT 1) AS telefono  
      FROM colaborador c WHERE c.id_colaborador = ?`,  
    [id_colaborador]  
  );  
}
```

- iii. For more detailed information, consult the WhatsApp Business API Documentation <https://developers.facebook.com/docs/whatsapp>
